

## Navigational Updates for *'Bikepacking in the Canadian Rockies'*

Below is a list of updates to the navigational cues featured in the first print of the guidebook. These updates will bring the written cues in the book in line with the GPX files provided at [bikepack.ca/routes/guidebook](http://bikepack.ca/routes/guidebook). The guidebook is an important resource for planning and research, however, it is recommended that you use the GPX files for navigation while on route. If you choose to rely solely on the written cues (not recommended), be sure to make note of these changes.

---

**Page 45, 1 km**

"Fairmont Banff Springs hotel on your ~~right~~ **left**."

---

**Page 46, 19.3 km**
